

Liyat's slide

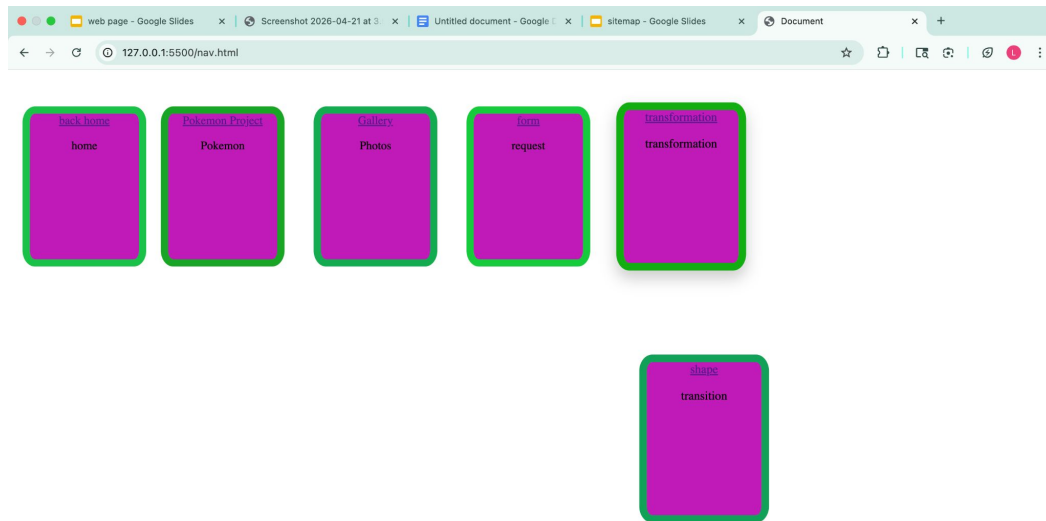

Home page

This is my main page where I talk about being a junior in high school and my plans to go into nursing. I also wrote a little bit about how much I like photography and added a thank-you note to my teacher.

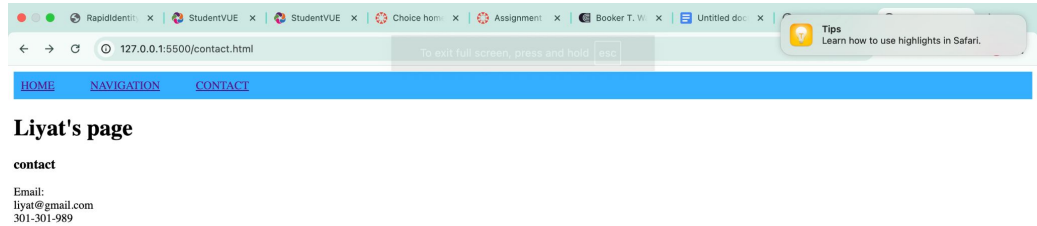

Navigation page

- Home: A button that takes you back to the main landing page.
- Pokemon Project: A section where you can see a Pokemon inside the project layout.
- Gallery: A page where you can view a collection of my pictures.
- Request Form: A place to fill out a form with your name and information.
- Transformation: An animation where a circle changes into a square in one second.
- Shape: An animation where a shape changes between a circle, triangle, and rectangle every second.

Contact page

- Contact Info: Includes my email and phone number so people can reach me.
- Purpose: A simple page for professional communication.

Accessibility checks

- Animations: I made the shape transitions smooth so they aren't distracting to the user.
 - Form Labels: I used clear labels on my request form so everyone knows exactly where to type their name and grade.
 - Colors: I chose high-contrast colors, like the purple cards and blue nav bars, to make sure all the text is easy to read.
 - ❖ As a user, I want to be able to explore different coding projects easily. Luckily, I can use the navigation cards to quickly jump between the photography gallery, the counselor request form, and the CSS shape animations.
-

Exit ticket answer

1) Primary User Story

"As a student , I want to navigate through different project cards easily so I can see my photography, coding animations, and the request form."

2) Sitemap & Path

- Sitemap (3 Nodes): Home \rightarrow Navigation \rightarrow Contact.
- Shortest Path: Clicking the "Contact" link directly from the top navigation bar on any page.

3) Two Accessibility Checks

- Color Contrast: Making sure the text is easy to read against the purple and blue backgrounds.
 - Clear Labels: Ensuring the form has clear instructions so anyone can fill it out correctly.
-
